## Abstract

14 One or two sentences providing a **basic introduction** to the field, comprehensible to a  
15 scientist in any discipline. Two to three sentences of **more detailed background**,  
16 comprehensible to scientists in related disciplines. One sentence clearly stating the **general**  
17 **problem** being addressed by this particular study. One sentence summarizing the main  
18 result (with the words “**here we show**” or their equivalent). Two or three sentences  
19 explaining what the **main result** reveals in direct comparison to what was thought to be  
20 the case previously, or how the main result adds to previous knowledge. One or two  
21 sentences to put the results into a more **general context**. Two or three sentences to  
22 provide a **broader perspective**, readily comprehensible to a scientist in any discipline.

### Methods

We report how we determined our sample size, all data exclusions (if any), all manipulations, and all measures in the study.

### Participants

### Procedure

### Data analysis

We used R (Version 4.4.1; R Core Team, 2024) and the R-packages *dplyr* (Version 1.1.4; Wickham, François, Henry, Müller, & Vaughan, 2023), *forcats* (Version 1.0.0; Wickham, 2023a), *ggplot2* (Version 3.5.1; Wickham, 2016), *lubridate* (Version 1.9.3; Grolemund & Wickham, 2011), *papaja* (Version 0.1.3; Aust & Barth, 2024), *purrr* (Version 1.0.2; Wickham & Henry, 2023), *readr* (Version 2.1.5; Wickham, Hester, & Bryan, 2024), *stringr* (Version 1.5.1; Wickham, 2023b), *tibble* (Version 3.2.1; Müller & Wickham, 2023), *tidyr* (Version 1.3.1; Wickham, Vaughan, & Girlich, 2024), *tidyverse* (Version 2.0.0; Wickham et al., 2019) and *tinylabels* (Version 0.2.4; Barth, 2023) for all our analyses.

### Results

(ref: chick- caption) Each chick was weighed every other day from birth to day 20 and on day 21. This plot shows the weight of each chick (y-axis) for each day they were measured (x - axis). Each point is one measurement.

### Discussion
